

Design & Deploy Services for EV Fleet Charging

We provide turnkey, comprehensive services to help fleets deploy EV charging infrastructure. From site design and hardware procurement, to fully operational charging depots, our team provides the expertise and support you need to ensure your infrastructure is:

ON BUDGET

RIGHT-SIZED

FUTURE-PROOFED

SCOPE OF SERVICES:

We oversee all Design & Deploy projects with a dedicated, on-staff project manager and can also provide construction managers or other site personnel if required.

DESIGN SERVICES INCLUDE:

- Infrastructure Site Analysis & Design
- Vehicle & Route Analysis
- Charging Strategy Analysis
- EVSE Recommendation & Selection
- Load Optimization
- Engineering Drawings
- Permitting Process

DEPLOY SERVICES INCLUDE:

- Comprehensive Project Management
- Licensed Subcontractor Selection
- Electrical & Charging Equipment Procurement
- Customer Liaison
- Safety & Security Procedures
- AHJ Approvals & As-Built Drawings
- Equipment Commissioning
- Utility Interconnection

"AMPLY has quickly integrated into our project and construction management team as a key member of the design-build process. We are very pleased with their execution at our new facilities." - Jim Appleby, Anaheim Transit Network

Let's Electrify Together.
