AMPLY POWER

OMEGA™ Charge Management System

Manage Your Fleet Charging All in One Place

Our fleet-first charge management software automates charging when energy costs are lowest, dynamically responding to your evolving needs each shift.
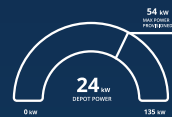

Connected & Technology-Agnostic

Integrations with EV chargers, fleet management, telematics, and more.
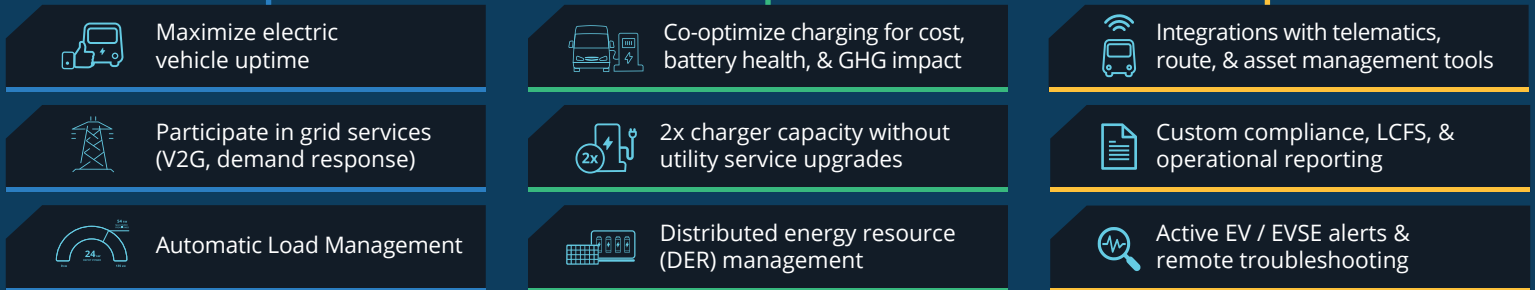

Out of the Box & Future Proofed

Ready to deploy today and built to evolve with your needs.

Adaptive & Automated Load Management

Delivers cost-optimized energy while respecting operational constraints.

OMEGA™

- Maximize electric vehicle uptime
- Participate in grid services (V2G, demand response)
- Automatic Load Management

- Co-optimize charging for cost, battery health, & GHG impact
- 2x charger capacity without utility service upgrades
- Distributed energy resource (DER) management

- Integrations with telematics, route, & asset management tools
- Custom compliance, LCFS, & operational reporting
- Active EV / EVSE alerts & remote troubleshooting

TRI DELTA TRANSIT.COM

"AMPLY helped us pinpoint the financial, operational, and equipment improvements we could make to realize 40 percent savings and ensure uptime for our riders who depend on our bus service to go about their daily lives. As we expand our EV fleet, we look forward to working with AMPLY to realize even greater savings."

- Steve Ponte, Chief Operating Officer, Tri Delta Transit

You're in the Driver's Seat with OMEGA™ Command Center

Our OMEGA™ Command Center is your user-friendly dashboard that functions as a 24/7 network operations center, providing real-time visibility to your EVs, EVSEs, power usage, and more. It can be viewed from any web browser and is optimized for mobile devices to allow you and your team to manage your EV fleet on the go.

- Oversee all EV charging stations and vehicles in real-time

- Monitor vehicles out on routes and track their expected state-of-charge when they return to the depot

- Track current and maximum electrical capacity at your fleet depot

- Follow each vehicle's state-of-charge (SOC) and time-to-completion charging estimates.

- Receive alerts and notifications in real-time

- Easily run savings, energy, equipment health, GHG emission reductions, and other operational reports

- Manage and monitor multiple depots all in one place

Let's Electrify Together.
